Application No. 10/735,453 Amendment dated October 4, 2007 Reply to Office Action of September 26, 2007 Docket No.: NY-TAYL 205-US

CENTRAL FAX CENTER

AMENDMENTS TO THE CLAIMS

The Children of the second reserved for the continued the second second

- Reagent useful in determining cyanuric acid in a fluid sample, (Original) comprising a 2,4-diamino-6-alkyl-1,3,5-triazine or ethylenebismelamine, wherein said alkyl contains from 1 to 10 carbons, is straight chained or branched, substituted or unsubstituted, and an indicator molecule, at a pH of from about 6 to about 9.
- The reagent of claim 1, wherein said reagent is at a pH of from about 2. (Original) 6.5 to about 9.
- The reagent of claim 1, further comprising a stabilizer. 3. (Original)
- The reagent of claim 1, further comprising an antioxidant. 4. (Original)
- The reagent of claim 1, further comprising an antioxidant and a (Original) 5. stabilizer.
- The reagent of claim 1, wherein said alkyl is straight chained and (Original) 6. consists of 1 to 4 carbon atoms.
- The reagent of claim 1, wherein said reagent comprises 2,4-diamino-(Original) 7. 6-methyl-1,3,5-triazine.
- The reagent of claim 1, wherein said indicator is cresol red or phenol (Original). red.
- The reagent of claim 3, wherein said stabilizer is propylene glycol. (Original)

Application No. 10/735,453

Armendment dated October 4, 2007

Reply to Office Action of September 26, 2007

Docket No.: NY-TAYL 205-US

- 10. (Original) The reagent of claim 4, wherein said antioxidant is sodium thiosulfate.
- 11. (Original) The reagent of claim 5, comprising cresol red, 2,4-diamino-6-methyl-1,3,5-triazine, propylene glycol, and sodium thiosulfate.
- 12. (Original) Apparatus comprising the reagent of claim 1, impregnated, absorbed or absorbed onto a solid carrier.
- 13. (Original) The apparatus of claim 12, wherein said solid carrier is absorbent or absorbent paper.
- 14. (Currently amended) The apparatus of claim 13, further comprising at least one other reagent suitable for determining a second analyte wherein said second analyte is present in said fluid sample being tested for presence of cyanuric acid.
- 15. (Original) A method for determining cyanuric acid in a fluid sample, comprising contacting said sample with the reagent of claim 1 and determining formation of or change of a color as an indication of presence or concentration of cyanuric acid in said fluid sample.
- 16. (Original) The method of claim 15, wherein said fluid sample is swimming pool water.
